

10 Years of Giving: Our Commitment to Global Health

Specialised Therapeutics is proud and committed to supporting a range of organisations and charities that are aligned with our business and healthcare mission. This philosophy and mindset is embedded in all parts of our business. Since we were founded 11 years ago, we have prudently selected synergistic causes where our contribution can make a difference - in research, in clinical development, in academia and in professional development. To date, we have provided corporate support to groups including Rare Cancers Australia, The Private Cancer Physicians of Australia organisation, the Australasian Gastro-Intestinal Trials Group, Dragons Abreast and the Upper GI Cancer Registry. We are also proud sponsors of the AGITG New Concepts Symposium, which recognises the best new research concepts each year at the AGITG annual scientific meeting.
