

Specialised Therapeutics Strikes Deal with World Courier Australia to Manage Logistics for Specialty Pharma Products

World Courier Australia selected to manage all delivery, storage operations for STA's growing portfolio of specialist healthcare products

Melbourne, Australia 16 June 2016: International biopharmaceutical company Specialised Therapeutics Australia has struck an important agreement with global logistics partner World Courier Australia (WCA) to manage and handle its growing portfolio of specialist healthcare products around the country.

Under the terms of the arrangement, WCA will undertake all critical logistics functions on behalf of STA, including receipt of pharmaceutical products, storage and delivery.

It will also assist STA with special labelling tasks and will prepare and deliver clinical trial products to key research sites in Australia and internationally as required.

Commercial terms are not being disclosed, but the arrangement formally takes effect in mid-July.

STA Chief Executive Officer Mr Carlo Montagner said WCA was carefully and strategically selected for its high standards, state of the art facilities and successful track record handling complex pharmaceutical products.

"No other specialty logistics company has the experienced personnel, global offices and in-market expertise required to ensure the optimal handling, transport and delivery of vital healthcare products," he said.

"This deal comes as we seek to expand our business and bring new therapeutics to patients and doctors in Australia.

“It is imperative we have the right logistics support and we are confident that WCA has the capability and sophisticated technology (including redundancy and back up systems) to ensure our speciality products are optimally handled and managed from end to end.”

World Courier is a part of AmerisourceBergen Corporation - one of the world’s largest pharmaceutical sourcing and healthcare distribution services companies with revenues in excess of US \$135 billion.

The Victorian World Courier Australia site is TGA-licensed for labelling, storage and secondary packaging. It has an ISO 9001 and ISO 14001 compliant quality management system.

Services provided include validated storage for drugs, diagnostic kits and medical devices. Further, WCA provides round-the-clock access to inventories, transport of all investigational drugs and supplies from country of origin to depot, as well as immediate delivery of specified drugs/kits from the depot to in-country locations.

WCA also has capability to oversee and manage drug return and destruction as required.
