

New Early Breast Cancer Drug to Reduce Risk of Recurrence or Death Now Available in the Philippines

Singapore, 8 July 2022: A NEW drug shown to significantly reduce the risk of cancer recurrence or death in an aggressive form of breast cancer is now approved by the Food and Drug Administration of the Philippines. The drug, NERLYNX (neratinib) is an oral medication taken daily for 12 months by women who have been diagnosed with early-stage HER2-positive (HER2+) breast cancer and who have received prior trastuzumab-based therapy.
